Chicago, IL | Phone: 201-675-4676 | Email: masonschick@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Work Experience

- Bank of America**, Quantitative Management Analyst Program, Chicago, IL July 2025 - Present
- Rotating across Enterprise Financial Risk / Liquidity Analytics and Global Financial Crimes Modeling & Analytics, including second-line Treasury risk oversight.
 - Calibrated thresholds for 26 macroeconomic metrics for an Early Warning Indicator dashboard
 - Analyzed and explained drivers of margin fluctuations in bilateral OTC derivatives to senior risk managers
 - Assessed the firm's funding profile and stress behavior across structured notes, repo, and commercial paper
 - Developed Python analytics to monitor rollover risk and track changes in the firm's wholesale funding
 - Won an internal AI use-case competition with a data visualization tool and presented the project to 85 colleagues, including senior line-of-business leadership
- JPMorgan Chase & Co.**, Credit Research Analyst, New York, NY June 2024 - August 2024
- Produced weekly credit research reports on high-yield and investment-grade consumer issuers
 - Modeled VF Corp's announced sale of Supreme and projected pro forma financials under two scenarios
 - Articulated the rationale for corporate bond trades based on company financials, spreads, and relative value
 - Built and updated two-year operating models for consumer, food, and retail issuers, forecasting revenue, margins, cash flow, leverage, and credit metrics
- Decision Modeling, Inc.**, Software Quality Analyst, Goshen, NY May 2023 - August 2023
- Tested accounting software and analyzed metadata to diagnose reconciliation issues
 - Identified and communicated software bugs to developers and performed follow-up testing

Technical Projects and Additional Experience

- Markets Research & Analytics Platform**, Developer June 2026 - Present
- Developed a full-stack Next.js/TypeScript research platform combining knowledge capture, market data, visualization, and financial modeling
 - Built a normalized data layer integrating 150+ metrics from FRED, SEC EDGAR, Yahoo Finance, and EIA
 - Researching how Kalshi and Polymarket FOMC contracts compare with CME FedWatch probabilities, focusing on contract design, implied distributions, and market reactions
- Fantasy Hockey Web App**, Developer May 2026 - Present
- Launched a fantasy hockey web app with 10 active users; built and deployed using Vercel and Supabase
 - Integrated external data sources and improved response times by optimizing caching and API call patterns
 - Built and maintained a Next.js/TypeScript codebase supporting user authentication, dynamic in-game updates, and extensive hockey analytics
- Jamerson Strategic Consulting**, Data Analyst, Memphis, TN (Remote) August 2024 - December 2024
- Completed a Lehigh-affiliated in-semester consulting internship, analyzing trade data across 15 countries
 - Built Tableau dashboards and synthesized trade trends to support my recommendations to the team
