Work Experience

Bank of America, Quantitative Management Analyst Program, Chicago, Illinois

July 2025 - Present

- Worked in Enterprise Financial Risk, providing second line risk management for the CFO Group/Treasury
- Calibrated thresholds and managed the status of 26 macroeconomic metrics for an 'Early Warning' dashboard
- Modeled Initial Margin fluctuations for OTC bilateral derivatives trades and communicated the mechanics to senior risk managers
- Analyzed the stress behavior of funding profile products, including Structured Notes, Repo, and CP
- Wrote code to track the firm's roll risk in wholesale funding products, and how its fluctuated over time
- Won an AI use case competition with a data visualization tool and presented my work to 85 people, including the senior leadership team of my LOB
- Second Rotation: Global Financial Crimes Modeling and Analytics

JPMorgan Chase & Co., Credit Research Analyst, New York, NY

June 2024 - August 2024

- Collaborated in a 3 person team while writing weekly research reports on Eidos
- Developed and updated models for consumer, food, and retail companies, forecasting 2 years of financials
- Modeled VF Corp's announced sale of Supreme and projected the new financials under 2 sets of assumptions
- Articulated rationale for corporate bond trades based on company financials, spreads, and relative value

Decision Modeling, Inc., Software Quality Analyst, Goshen, NY

May 2023 - August 2023

- Tested software designed for reserve determination under accounting rules for ASC 740-10 and FAS 5
- Forecasted solutions to programming and accounting problems through Excel-based data manipulation
- Identified and communicated software bugs to the programming team and performed additional testing to ensure the issues were resolved

Selected Projects / Activities

Fantasy Hockey Web App, Founder / Developer

May 2026 - Present

- Launched fantasy hockey web app with 10 active users; built and deployed using Vercel and Supabase
- Integrated external data sources and improved response times by optimizing caching and API call patterns

Financial Markets Dashboard, Developer

June 2026 - Present

- Building a financial dashboard to visualize market data, macroeconomic indicators, and company financials
- Designed the project around Python/data visualization workflows that amplify my existing mental models

Jamerson Strategic Consulting, Data Analyst, Remote (Memphis, Tennessee)

August 2024 - December 2024

- Completed an in-semester internship through Lehigh, analyzing trade data across 15 countries
- Built Tableau dashboards and synthesized trade trends to support my recommendations to the team
